

## NINA MARCO

---

Antonina Marco, founder and principle of Casa de Marco Design, has worked on design and build projects ranging from unique contemporary oceanfront villas in Great Exuma, Bahamas to her latest project ,the restoration of a historic home in Delray Beach Florida .Originally built in 1939, the classic old Florida style home was in an advanced state of neglect and disrepair. The challenge of this featured project was keeping the integrity and coastal charm of the Marina Historic District,while following strict guidance from the city of Delray Beach Historic Preservation Board and at the same time adding a modern luxurious feel to the interior living space. The open kitchen concept stands out with the Calacutta stone, glass and mirror backsplash from Akdo that compliments the white Macaubas quartzite countertops. The Downsvie cabinetry accented by the champagne finished hardware and the custom stainless hood, gives this kitchen a warm modern feel blending with the coastal contemporary design. Each of the bedrooms open up to a stunning backyard oasis incorporating a lounge area surrounded by the glass tiled saltwater pool with spa jets,waterfall and an inviting fire pit. Each bedroom has ensuite bathrooms with textured wall tiles, exquisite white Carrara tile flooring and spa inspired fixtures from **Porcelanosa**.
